DARK MATTER redefines the interfaces between technology, creativity and interaction in order to create space for personal sensory experiences.

DARK MATTER is an exhibition made of expansive light installations within a converted factory. The exhibition introduces new and technical concepts, most of which will be made visible to the public for the very first time.

Technical Project Manager (m/f/d)

full-time| Berlin

YOUR TASKS:

* Planning, coordination, and management of technical development projects in the field of art for DARK MATTER. From the concept phase through to implementation, while ensuring compliance with quality, timeline, and budget requirements.
* Active involvement in mechanical design and development, including individual components, assemblies, and custom-built constructions.
* Development and implementation of technical solutions for kinetic installations, moving structures, and mechanically complex lighting and media systems.
* Close collaboration with development, production, procurement, and other internal and external specialist departments to ensure successful project implementation.
* Working with mechanical drive systems, automation technology, and interfaces to control systems to support the integration of complex art installations.
* Identification and resolution of technical challenges through troubleshooting, root cause analysis, as well as testing and validation procedures.
* Technical support during manufacturing, assembly, installation, and commissioning of the art installations at DARK MATTER to ensure the successful implementation of the developed solutions
* Creation and review of technical drawings, bills of materials (BOMs), specifications, and other technical documentation.

YOU BRING:

* A degree in Mechanical Engineering, Mechatronics, or a related technical field, or an equivalent technical qualification.
* Several years of experience in mechanical engineering, technical development, or special-purpose machinery (Sondermaschinenbau).
* Experience managing technical projects or taking ownership of complex engineering work packages.
* Strong hands-on mechanical design and problem-solving skills, with experience developing components and assemblies.
* Understanding of mechanical drive systems, automation, control systems, and the integration of moving mechanical structures.
* Experience working with CAD software and preparing technical drawings, BOMs, and engineering documentation.
* Practical experience supporting manufacturing, assembly, testing, or commissioning.
* A structured and independent working approach, combined with the ability to collaborate across technical teams.
* Strong communication skills and the confidence to coordinate with internal and external stakeholders.
* Good English communication skills, German is a plus.

WE OFFER:

* A highly motivated, international team — we stand for openness and diversity
* Independent work, flat hierarchies, and the opportunity to contribute your own ideas
* Free German language courses at a centrally located partner school
* Attractive discounts for Urban Sports Club memberships
* Team events such as BBQs and summer parties
